

MED-SPORT™

Med-Sport™ is a biofeedback micro-current therapy medical device designed for the physically active body to relieve achy, sore or strained muscles. Whether a professional, Olympian or young beginner, all athletes can benefit from this economical medical device

designed to provide immediate relief anywhere, anytime at your convenience.

WHY MED-SPORT™

Biofeedback relaxation massage therapy techniques may shorten recovery time from strained or injured muscles.

Healthcare professionals design special therapies for individual specific activities such as a pitcher's shoulder and arm or the feet, the back, or the legs.

Improve range of motion quickly with enhanced Med-Sport™ therapies designed to improve body and muscle efficiency.

Relief from years of bodily physical abuse often obtained in a few minutes from patented therapies using Med-Sport™.

BEST - RSI™

BEST-RSI™

For more serious, chronic conditions, the Best-RSI™ device is recommended. A patent pending micro-current biofeedback device, Best-RSI™ is specifically designed for when deeper therapy penetration is desired or needed.

Med-Sport™ and Best-RSI™ are available through team trainers, physical therapists, chiropractors and other health care professionals. Prescription required.

Not intended for individuals with pacemaker or other implanted electronic device or who may be pregnant.

M.E.A.D.™

(Meridian Energy Analysis Device)

TAP INTO YOUR BODY'S ENERGY RESOURCES

While Med-Sport™ and Best-RSI™ are designed to promote muscle relaxation, muscle re-education and help shorten muscle recovery, balancing the body's energy meridians can also be an important tool in pinpointing where these therapies can be applied most effectively.

Effective relaxation and stimulation therapies combined with M.E.A.D.™ analysis system can improve energy balance and body function efficiency, which may improve sleep, muscle efficiency, body's energy focus, and overall body balance.

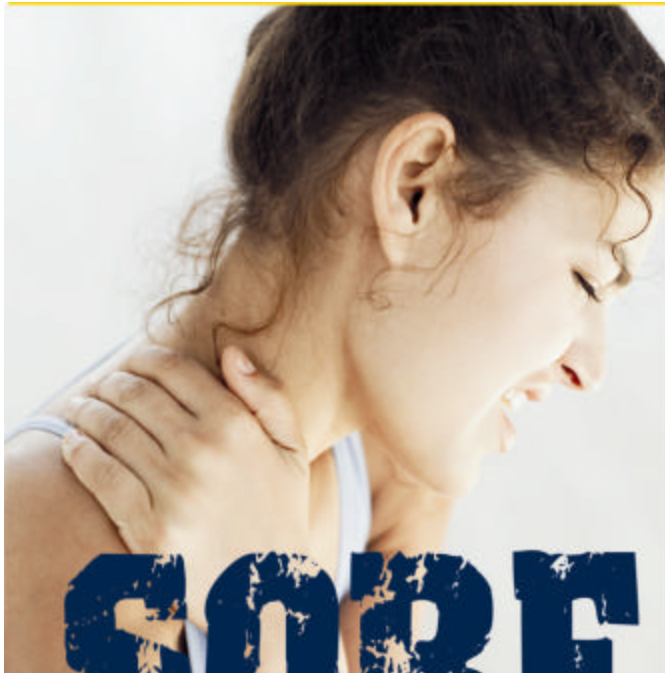

M.E.A.D.™

The Meridian Energy Analysis Device (M.E.A.D.) is an electro-acupuncture device designed to measure the body's complete energy systems. This procedure is non invasive and can be completed in just 3 minutes.

HOW IT WORKS

By tapping into ancient Eastern and Chinese techniques for balance and streamline efficiency, the M.E.A.D.™ system electronically takes a body reading using the body's natural acupuncture points. The device then measures and analyzes the body's energy meridians and graphically indicates therapy locations for improved balance and efficiency. Charts and diagrams report energy imbalances and therapy locations.

SORE MUSCLES

Now there's fast acting relief! Relax achy, sore, strained and/or stiff muscles anywhere, any time painlessly at your convenience and without drugs. A revolutionary new biofeedback micro-current therapy can improve muscle efficiency and shorten recovery time of stressed muscles. It is quick, easy and safe.

TESTIMONIALS

I have received several major injuries during my tenure in sports-- high school through my professional career. I have tried everything I could find to sooth and relieve my aching muscles and tendons. After only 20 minutes of therapy, the Med-Sport™ brought relief I have been trying to find for years. As a coach, I consider Med-Sport™ and Best RSI™ units to be the next generation of approved therapy devices to be recommended by team doctors, team trainer and people like myself who know the value of positive results. It really works.

Bill Scott, former NFL lineman for LA Rams, Football Hall of Fame Recipient and President of the Redman's Coaching Association

(Bill has suffered over 11 broken bones in his hands and associated related ailments in each hand from his professional career.)

The M.E.A.D. Pro™ not only verifies my TCM diagnosis and herbal recommendations, but also has proven to be a very effective tool in acquiring new patient referrals.

Dr. Zev J. Myerowitz D.C., LAc., Dipl. Ac. (NCCAOM)

My wrestling team uses the Avazzia Med-Sport™ with great results. We have found it to be especially effective on sprains and muscle tears. Injuries heal much quicker with the use of the Med-Sport™, allowing the injured athlete to return to competition much sooner. I enthusiastically recommend the Med-Sport™ to any coach or athlete.
